                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1061
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  The present sequence is the coding sequence for a human secreted protein. It was isolated from an adult pancreas cDNA library. The proteins and coding sequences of the invention can be used in the isolation of similar genes and proteins, in the elucidation of their function in vivo, and to treat a number of conditions. It is possible that they may have uses as nutritional supplements, as cytokine or cell proliferation factors, in immune modulation, where they may be used to treat immune and autoimmune diseases, as haematopoiesis regulators (treating myeloid or lymphoid cell deficiencies), in the promotion of tissue growth, they may have chemokine or chemotactic activity, haemostatic or thrombolytic activity, or anti-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       88

immunosuppressant and cytostatic activity. The polynucleotides are useful in gene therapy. A composition containing a polypoptide or polynucleotide strength in gene therapy. A composition containing a polypoptide or polynucleotide of the invention may be used to treat diseases of the peripheral nervous system, such as peripheral nervous injuries, peripheral nervous system, such as peripheral nervous injuries, peripheral nervous localised neuropathies and central nervous system disease, such as lateral sclerosis, and Shy-brager Syndrome. Other uses include the utilisation of the activities such as: Immune system suppression, Activin/inhibin activity, chemotactic/chemokinetic activity, haemostatic and thrombolytic activity, chemotactic/chemokinetic activity, haemostatic and thrombolytic activity, arthritis and inflammation, leukaemias and contains, assays for receptor activity, arthritis and inflammation, leukaemias and contains, and contains and thrombolytic activity arthritis and inflammation, leukaemias and contains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1144 ACGGGATTTCTGGGCGTGGTCACGGGGGCAGGAGCCACGCGCTGGTGCCGCTGAAGACC 1203

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ઠે
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     The invention relates to human nucleic acids (AAIS7798-AAI61369) and the encoded polypeptides (AAM38642-AAM42213) with nootropic, immunosuppressant and cytostatic activity. The polymuclectides are useful immunosuppressant and cytostatic activity. The polymuclectides are useful in gene therapy. A composition containing a polypeptide or polymuclectide of the invention may be used to treat diseases of the peripheral nervous system, such as peripheral nervous injuries, peripheral neuropathy and contral nervous system diseases, such as localised neuropathies and central nervous system disease, amyotrophic lateral sclerosis, and Shy-Drager Syndrome. Other uses include the utilisation of the activity, chemotactic/chemotinetic activity, haemostatic Activin/inhibin activity, cancer diagnosis and therapy, drug screening, assays for receptor activity, architits and inflammation, leukaemias and C.N.S disorders. Note: The sequence data for this patent did not form

The present sequence encodes the human 46455 protein, which is a member of the transporter family. The transporter family proteins (I) of the present invention have anorectic, antidiabetic, anti-Parkinsonian, cardiovascular and immunosuppressive activities, and can be used in gene cherapy. The human transporter proteins from the present invention are designated 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL and assays (e.g. chromosome mapping tissue typing, or in forensic biology), can dum enchodes encoding (I) can be used in screening predictive medicine (e.g. diagnostic assays, prognostic assays, cand in methods of treatment (e.g. therapeutic or prophylactic). (I) are production of 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL or 67084BL substrates or production of transport 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL or 67084BL inhibitors. Disorders associated with 8099 and 46455, include disorders associated with sugar homeostasis (c.g. parkinson a disease or Alzahamer's disease or Algease), autonomic function or memory disorders (e.g. isolateria or age-related disorders) or learning cardiovascular disorders (e.g. isolatenia), or learning cardiovascular disorders (e.g. isolatenia reperfusion injury or crestenosis), hormonal disorders (e.g. hypothyroidism), were confirmed alsorders (e.g. chronic muccoutaneous candidiasis) dakctagaadagactacadagacatacaccagactacaccagacatradacracaradr 185 CGCCATCCTCAGCTTGGGCAACGTGCTCAACTACCTGGACAGGTACACCGTGGCAGGCGT 401 186 GGGGGGGCTGCTACATCACTCCTGAACTACATGGACGGCTTCACCGTGGCGCGT 245 402 CCTICTGGACATCCAGCAGCACTTTGGGGTCAAGGACCGAGGCGCCGGCCTGCTGCAGTC 461 9 Query Match

The invention relates to TWIK-6, TWIK-7, IC23927, TWIK-8, IC47611,

CC IC47615, HNMDA-1, TWIK-9, alpha-2delta-4, 54414 and 53763 ion channel

CC IC47615, HNMDA-1, TWIK-9, alpha-2delta-4, 54414 and 53763 ion channel

CC family (ICF) nucleic acids and proteins The TWIK-6, TWIK-7, IC23927,

TWIK-8, IC47611, IC47615, HNMDA-1, TWIK-9, alpha-2delta-4, 54414 and

CC 53763 ICF nucleic acids and proteins may be used for preventing,

diagnosing and treating ICF-related diseases. The sequences may be used

CC contents and special and patient's genome that affect the activity of

mutations or deletions in a patient's genome that affect the activity of

CC patients own production of ICF proteins or to supplement the

CC patients own production of ICF proteins and in

CC anti-ICF protein of ICF protein expression and activity. The

antigens in the production of antibodies against ICF proteins and in

CC anti-ICF protein and activity. The antibodies may be used to

CC samples (e.g. by immunossasi). The nucleic acids and proteins may be used

CC samples (e.g. by immunossasi). The nucleic acids and proteins may be used

CC samples (e.g. by immunossasi). The nucleic acids and proteins may be used

CC samples (e.g. by immunossasi). The nucleic acids and proteins may be used

CC samples libepsy, hepatic disorders and cardivascular disorders.

CC samples libepsy, hepatic disorders and cardivascular disorders. This

CC sequence represents cDNA encoding the human 46455 protein of the

convention. Note: The sequence data for this patent is also available in

CC electronic format from USPTO at sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            521

```
polymucleotides and/or polymetides whose expression pattern is predictive of the response of cells to treatment with a compound that modulates protein tyrosine kinase activity or members of the protein tyrosine kinase pathway. The molecules of the invention demonstrate cytostatic, antiangiogenic, vasotropic and vulnerary activities and may be useful in the field of pharmacogenomics, in particular for determining drug sensitivity and in treating breast cancer, hypervascular diseases, angiogenesis and scars in wound healing. The current sequence is that of a human protein tyrosine kinase biomarker DNA of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       401

The invention relates to human nucleic acids (AAIS7798-AAI61369) and the encoded polypeptides (AAM36642-AAM42213) with nootropic.
immunosuppressant and cyrostatic activity. The polymucleotides are useful in gene therapy. A composition containing a polypeptide or polymucleotide of the invention may be used to treat diseases of the peripheral nervous system, such as peripheral nervous injuries, peripheral nervous allocalised neuropathies and central nervous system diseases, such as Alzheimer's, Parkinson's disease, Huntington's disease, amyotrophic lateral sclerosis, and Shy-brager Syndrome. Other uses include the utilisation of the activities such as: Immune system suppression, Activin/inhibin activity, chemotactic/chemokinetic activity, haemostatic and thrombolytic activity, anner diagnosis and therapy, drug screening, assaays for receptor activity, arner diagnosis and inflammation, leukaemias and sassays for receptor activity, arthritis and inflammation, leukaemias and Son Station of Son Station
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ä
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Novel nucleic acids and polypeptides, useful for treating disorders such

           or triangulture realization and interior present invention have anorette, antidiabletic, anti-Parkinsonian, present invention have anorette, antidiabletic, anti-Parkinsonian, cardiovascular and immonsuppressive activities, and can be used in gene therapy. The human transpotrer proteins from the present invention are designated 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL and 67084AL subscription of 8099, 46455, 54414, 53763, 67102, 44181, 67084FL or 67084AL subscription of treating disorders characterised by insufficient or excessive production of 8099, 46455, 54414, 53763, 67102, 44181, 67084FL or 67084AL subscription of transport 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL or 67084AL subscription of transport 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL or 67084AL subscription of transport 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL or 67084AL subscription of transport 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL or 67084AL subscription of transport 8099, 46455, 54414, 53763, 67076, 67102, 44181, 67084FL or 67084AL are e.g. CNS disorders such as obesity, diabetes or anorexia. Disorders associated with sugar homeostasis cuch as obesity, diabetes or Alzheimer's disease, autonomic function disorders (e.g. hypertension, depression or schizophrenia), or learning or memory disorders (e.g. hypertension or schizophrenia), or learning cretenosis), hormonal disorders (e.g. hyporchyroidism or hyperthyroidism), cretenosis), hormonal disorders (e.g. hyporchyroidism or hyperthyroidism), cretenosis), crimune disorders (e.g. chronic muccoutaneous candidiasis)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1040

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The invention relates to an isolated nucleic acid comprising a cDNA encoding a human transporter protein, or its complement, a sequence that is encoding a human transporter protein, or its complement, a sequence that is 60 % identical to the CDNA, a fragment comprising at least 30 nucleotides of the CDNA, or a sequence encoding a fragment of the CDNA show included are a vector comprising the novel nucleic acid molecule, producing the polypeptide, the isolated transporter polypeptide, an isolated antibody that specifically binds to the polypeptide, an isolated antibody that specifically binds to the colypeptide, an isolated antibody that specifically binds to the colypeptide, an isolated antibody that binds to, or that modulates a sample, a kit, identifying a compound that binds to, or that modulates the activity of the polypeptide, and modulating the activity of the polypeptide, and modulating the activity of the colypeptide, and modulating a composition for treating PGC-1 (not defined) associated disorders e.g. liver tumours, coesity, epilopsy or diabetes. The present sequence encodes a novel human components protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  401

                 anti-ICF protein antibodies, agoniets and antagoniets may be used to regulate ICF protein expression and activity. The antibodies may also be used as diagnostic agents for detecting the presence of ICF proteins in samples (e.g. by immunosasay). The nucleic acids and proteins may be used to prevent, diagnose and treat a wide variety of disorders, e.g. cancers and leukaemia, Albraimer's disease, parkinson's disease, multiple sclerosis, epilepsy, hepatic disorders and cardiovascular disordere. This sequence represents obba encoding the human 46455 protein of the
identify modulators of ICF protein expression and activity. The
                                                                                                                                                                                                            invention. Note: The sequence data for this patent is also available in electronic format from USPTO at sequata.uspto.gov/sequence.html.

The invention relates to novel genes (ABL89449-ABL90853) and proteins (ABB89040-ABB90444) useful for preventing, treating or ameliorating medical conditions e.g. by protein or gene therapy. The genes are endical conditions e.g. by protein or gene therapy. The genes are calcated from a range of human tisues disclosed in the specification.

C isolated from a range of human tisues disclosed in the specification.

C the diagnosis, treatment and prevention of: (a) cancer, e.g. breast and ovarian cancer and other cancers of the adrenal gland, bone, bone marrow, breast, gastrointestinal tract, liver, lung, or urogenital; (b) immune disorders e.g. Addison's disease, allergies, autoimmune haemolytic andemia, autoimmune thyroiditis, diabetes mellitus, Crohn's disease,

C ansemia, autoimmune thyroiditis, diabetes mellitus, Crohn's disease,

C multiple sclerosis, rheumatoid arthritis and ulcerative colitis; (c)

c cardiovascular disorders such as myocardial ischaemias; (d) wound healing

C infectious diseases e.g. cerebral anoxia and epilepsy; and (f)

infections. Note: The sequence data for this patent did not form part of the printed specification, but was obtained in electronic format directly

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 13, P.
